SHRINIDHI D S

Bengaluru, India | +91 7619640838 | shrinidhigowda.02@gmail.com | linkedin.com/in/shrinidhi-d-s-16a66a353 | github.com/Shrinidhi-02

PROFESSIONAL SUMMARY

AI/ML undergraduate (B.E., expected 2027) with hands-on experience in machine learning, data analysis and Python development through internships at FlyRank AI and Infotact Solutions. Built a Random Forest demand forecasting model and an OpenAI-powered coding agent, with strong skills in data preprocessing, feature engineering, model evaluation and pytest. Seeking AI/ML, Data Science or Python Developer internship roles.

TECHNICAL SKILLS

- **Languages:** Python, SQL
- **Libraries & Frameworks:** Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, Streamlit
- **AI & Automation:** OpenAI API, Prompt Engineering
- **Tools:** Git, GitHub, Jupyter Notebook, Google Colab, VS Code, Power BI
- **Soft Skills:** Communication, Problem Solving, Teamwork, Adaptability

EXPERIENCE

Machine Learning Intern *Sep 2026 – Present*

FlyRank AI, Remote

GitHub: github.com/Shrinidhi-02/flyrank-machine-learning

- Developed an explainable, rule-based baseline score to rank content for review (freshness, CTR, search position, impressions).
- Built a ranked review queue with reason codes and action labels; reviewed the top 20 items and documented why each was chosen and how it could be wrong.
- Evaluated two performance signals using observed decline rates and documented their limitations.
- Ran feature leakage checks to keep outcome data out of scoring inputs, and committed reproducible notebooks to GitHub.

Python Development Intern *Sep 2026 – Present*

Infotact Solutions, Remote

GitHub: github.com/harshNIU/PyChronicle-AST-Powered-Time-Travel-Debugger *(branch: Shrinidhi-ast-engine)*

- Developed the AST parser, visitor, and rewriter modules (Python ast) for PyChronicle, a debugging tool built by a team of 5 that replays program execution step by step.
- Implemented hook injection that captures program state without changing the original source code.
- Tested the rewriter with pytest on example scripts (loops, recursion, class methods) and handled edge cases (decorators, comprehensions, multi-file scripts).
- Coordinated with the Execution Engine lead on the rewriter-tracer hook interface; the team's pytest suite passes (98 tests) and the tool recorded 206 frames on a sample script.

PROJECTS

Retail Demand Forecasting System *(Python, Scikit-learn, Pandas, Machine Learning, Random Forest)*

Machine Learning: Random Forest, Regression, Feature Engineering, Model Evaluation

- Built and evaluated a Random Forest Regression model on a small 30-day sales dataset (RMSE 2.95, R-squared 0.624).
- Saved the trained model (demand_model.pkl) so predictions run on demand without retraining.

GitHub: github.com/Shrinidhi-02/Retail-Demand-Forecasting

AI Software Engineer (Mini Devin) *(Python, OpenAI API, Streamlit, SQLite)*

- Developed an AI coding agent that plans, generates, tests, and runs Python projects from plain-English requirements (OpenAI API, Streamlit).
- Added automated testing with unit test generation, error-fix attempts, and a SQLite-backed history dashboard with data visualization charts.

GitHub: github.com/Shrinidhi-02/ai-software-engineer-mini-devin

EDUCATION

Bachelor of Engineering (B.E.) in Artificial Intelligence and Machine Learning *Expected 2027*

Akash Group of Institutions, Bengaluru — CGPA: 7.1/10

Class 12 (PCMB) — Pre-University Course *2023*

SDM PU College, Ujire — 383/600 (First Class)

CERTIFICATIONS & LEARNING

- AI/ML: Oracle Certified Foundations Associate (AI Foundations & Agentic AI)
- Additional Learning: IBM SkillsBuild AI Fundamentals • Udemy Machine Learning & AI Beginners Course
- Programming & Data: HackerRank Python (Basic) Certification • Oracle SQL Explorer • Power BI Workshop - OfficeMaster
